Atty. Docket No. 21520-RA

## **AMENDMENTS IN THE SPECIFICATION:**

Please replace the paragraph beginning at page 9, line 13 with the following amended paragraph:

Referring now to FIG. 1, apparatus 10 is preferably made of a fleece-type material and preferably has head portion 20 with eye opening 30 formed therethrough. Front torso portion 40 preferably has zipper 50 therein, wherein zipper 50 preferably extends from zipper top 52 and lies preferably proximate head portion 20 down the full length of front torso portion 40, and preferably to zipper bottom 54. Zipper bottom 54 preferably lies proximate to base perimeter 60, wherein base perimeter 60 is preferably secured to ground G by inserting stakes 70 (best shown in FIG. 3) preferably through securing grommets 80. Base perimeter 60 is preferably secured in a rectangular, nearly square, fashion, thereby preferably providing a tent-like enclosure via base 90 of apparatus 10.

Please replace the paragraph beginning at page 11, line 4 with the following amended paragraph:

Referring now to **FIG. 2**, illustrated therein is apparatus

10 from a rear perspective. Rear portion 120 of apparatus 10

preferably has opening 130 preferably located below head portion 20 and proximate to top 142 of rear torso portion 140. Opening 130 is preferably sized for passage therethrough of cable C suitable for utilization in tethering the wearer of apparatus 10 via harness H. When apparatus 10 is utilized in a tree blind or raised area P, cable C preferably passes through reinforcing grommet 132 and secures above the user. Base perimeter 60 is secured by clips 72 through grommets 80. Zipper 160 is preferably located below opening 130, preferably from zipper top 162, wherein zipper top 162 extending preferably lies proximate top 144-143 of base portion 120, to zipper bottom 164, and wherein zipper bottom 164 preferably lies proximate to base perimeter 60. Zipper 160 is preferably selectively utilized to allow apparatus 10 to be secured over

Please replace the paragraph beginning at page 11, line 22 with the following amended paragraph:

an object, such as a post, a tree stump or a fixed chair.

Referring now to FIG. 3, apparatus 10 is shown in use by outdoorsman O. Outdoorsman O preferably installs apparatus 10 over chair 100, securing apparatus 10 over and around chair 100 by use of zipper 160 (see FIG. 2). Once zipper 160 is closed, zipper 160 is covered by closing snaps 142145, thereby

securing flap 144 and providing a heat-tight environment barrier at the rear of apparatus 10. Outdoorsman O then

preferably enters apparatus 10, secures or closes zipper 50,

and thereafter preferably closes snaps 56 to secure flap 58.

Once fully enclosed with apparatus 10, Outdoorsman O may

maintain weapon  ${f W}$  in a ready condition, held either inside

apparatus 10 externally thereof. Outdoorsman O may further

selectively stand or sit on chair 100. Heater 110 preferably

provides warmth to the air contained within apparatus 10,

thereby providing a contained and warmed environment for

outdoorsman O.
